

Old Lorain Connector Trail Update Project Update December 19, 2024

Old Lorain Road Connector Trail

Project Location

19. There is an excellent opportunity for an attractive approach on a good grade following the line of the old road, but it is essential to protect the banks of the ravine through which this road descends, and the exact limits of the area to be protected, as well as the exact location of the permanent road and of supplementary streets necessary for the best development of the adjacent land, cannot be determined without additional topography. The approach is drawn arbitrarily 200 feet wide between building lines, but less than that in places might prove enough to accomplish the purpose.

1915-1916
Com. av. Moses & Strickland
Report on Tunnel Creek Valley - Sept 22, 1915 (to Moses)
and Rocky River Valley 10 Feb 1916

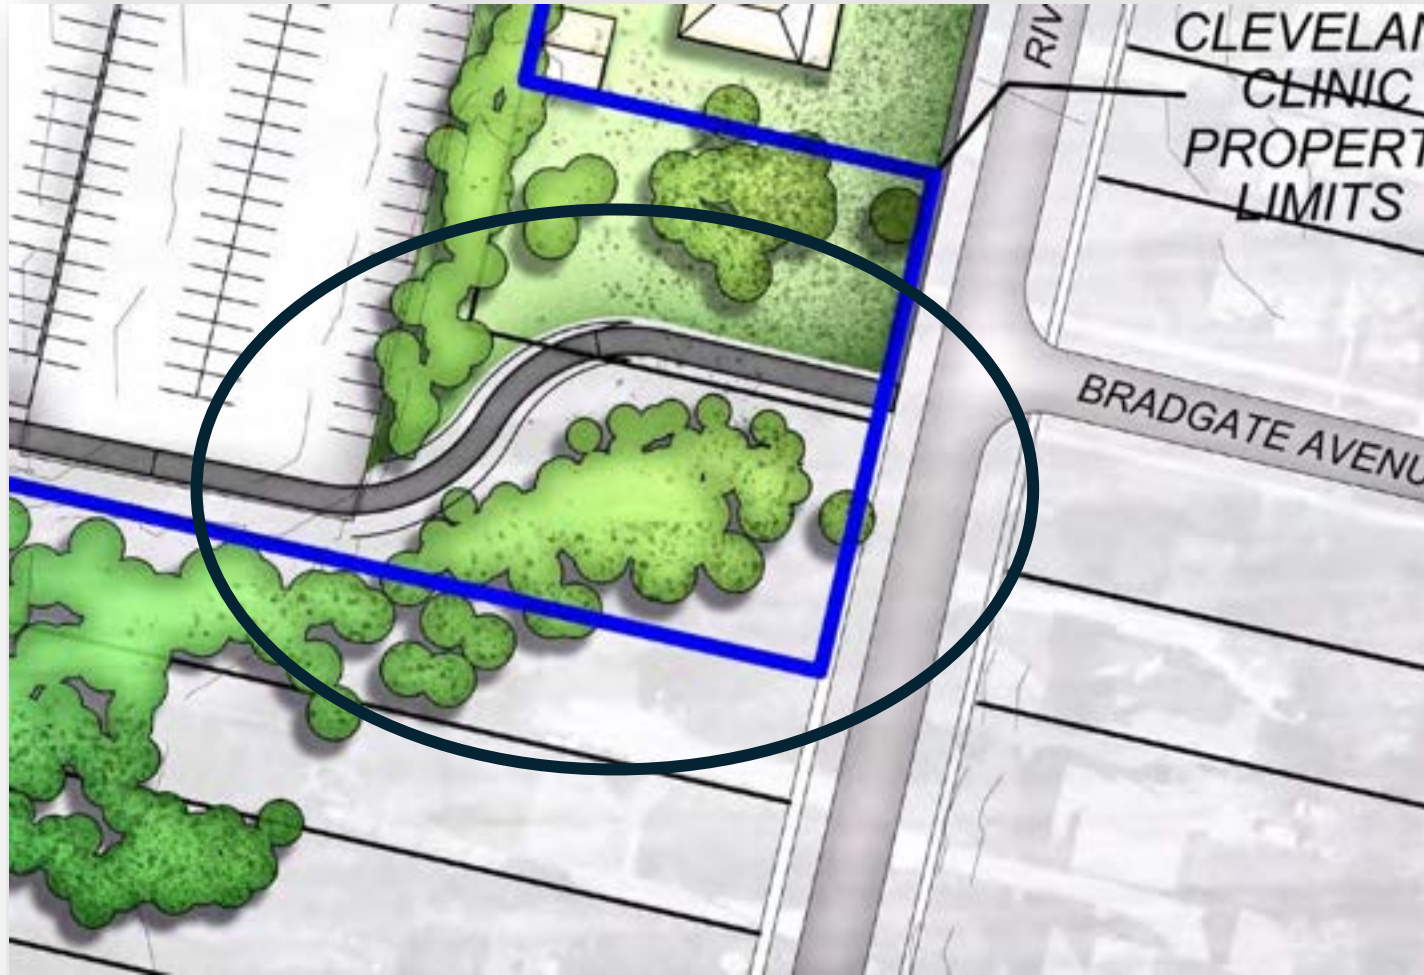

Old Lorain Road Access Study

Bike and Pedestrian Connectivity between Cleveland's West Park / Kamm's Corners Neighborhood, Fairview Hospital, and the Cleveland Metroparks
